- Coaching – Dr. Ivan Cheng, California State University, Northridge, Arches Access Project
- Policy- State Board Vice President, Dr. Ilene Straus
- Southern California Mathematics Specialists/Coordinators/TOSAs

PURPOSE

Building a strong foundation to implement the California Mathematics Standards is imperative if CA is to remain a leader in STEM fields. This year's CMC -S Leadership Conference aims to support districts' Local Control Accountability (LCAP) plan goals that focus on effective coaching, communicating with parents and building programs to match policy. All are areas that research has identified as steps needed to improve mathematics proficiency for ALL students. Come hear from experts in these fields.

School Board Members, Superintendents, Assistant Superintendents, Directors and Coordinators of Mathematics Curriculum and Instruction, Principals, Math Coaches, County, District and Site Leaders interested in networking and learning how implementation of the new CA Mathematics standards is being supported, CMC-S invites you to learn first hand from Southern California and State Mathematics Leaders.
